PROFILE

Generative AI and Machine Learning engineer with strong hands-on experience in LLMs, Transformers, RAG systems, vector databases, and AI agents. Experienced in building end-to-end GenAI applications including RAG pipelines, AI agents, and LLM-powered systems using LangChain, Hugging Face, and OpenAI APIs, with deployment exposure on cloud platforms. Seeking high-impact AI roles in startups and product-based companies.

EDUCATION

Dayananda sagar college of engineering, B.E in ECE(CGPA-8.56)	2022 – 2026 Bangalore, India
Sri chaitanya PU college, 12th board(Percentage-95%)	2020 – 2022 Ballari, India
Nandi school, 10th board(Percentage-94.08%)	2010 – 2020 Ballari, India

INTERNSHIP EXPERIENCE

Polaris India Pvt Ltd, intern	08/2025 – 11/2025
- Developed a Bluetooth-based application to communicate with GoPro devices - Implemented device discovery, connection handling, and control features - Gained experience in real-world system integration and communication protocols - Strengthened understanding of real-world software development workflows and system-level communication	

SKILLS

Programming: Python (NumPy, Pandas, Matplotlib, Seaborn), SQL

Machine learning & Deep learning: Machine Learning, Neural Networks, Transfer Learning, Transformers

Generative AI & LLMs: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents

Libraries & Frameworks: PyTorch, TensorFlow, Keras, Hugging Face, LangChain

Vector Databases & Embeddings: FAISS, ChromaDB, Text Embeddings

Deployment & Tools: Streamlit, Flask, GitHub, AWS EC2 (basic)

PROJECTS

- Intelligent Document Assistant (RAG-based AI System)**
- Built a Retrieval-Augmented Generation (RAG) system to answer user queries from large PDF documents.
 - Implemented document chunking, embedding generation, and semantic similarity search using vector databases
 - Integrated LLM-based response generation grounded on retrieved context to minimize hallucinations
- LLM-Powered Interview Question Generator & Evaluator**
- Built an LLM application that generates role-specific interview questions
 - Evaluates candidate answers using LLM-based semantic scoring
 - Supports multiple domains: ML, GenAI, Python, SQL
- AI Agent for Automated Resume Screening & Scoring**
- Developed an AI agent that analyzes resumes against job descriptions
 - Automatically scores candidates based on skills, experience, and role relevance
 - Demonstrates agent-based reasoning and decision-making

SOFT SKILLS

Problem Solving | Quick Learner | Team Collaboration | Adaptability

CERTIFICATES

- NPTEL course - Foundation in IOT cloud edge ML
